Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A busy, tech-conscious online consumer who values speed, clean interface designs, and minimal checkout friction.	Browse, select, and purchase various household goods, clothes, and electronic devices in local currency (₹) using a single, unified storefront.	I encounter cluttered, slow-loading websites that require redundant inputs and lose my shopping cart when I accidentally refresh or log in.	Most legacy e-commerce websites rely on rigid templates that fail to dynamically adjust to different product categories and lack persistent local state synchronization.	Frustrated, impatient, and apprehensive about completing my purchase, ultimately driving me to abandon the cart.
PS-2	A small business owner managing a local retail store with limited technical expertise.	Manage my online product inventory efficiently and print clean, professional order invoices for my physical accounting records.	I am forced to navigate overly complex admin dashboards, fill out irrelevant product fields (like apparel sizes for electronics), and rely on clunky, unformatted browser printing.	Traditional e-commerce platforms use rigid, one-size-fits-all database structures and lack built-in, layout-isolated print styling for administrative tasks.	Overwhelmed, exhausted by unnecessary administrative overhead, and frustrated that simple tasks take valuable time away from running my business.
