Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

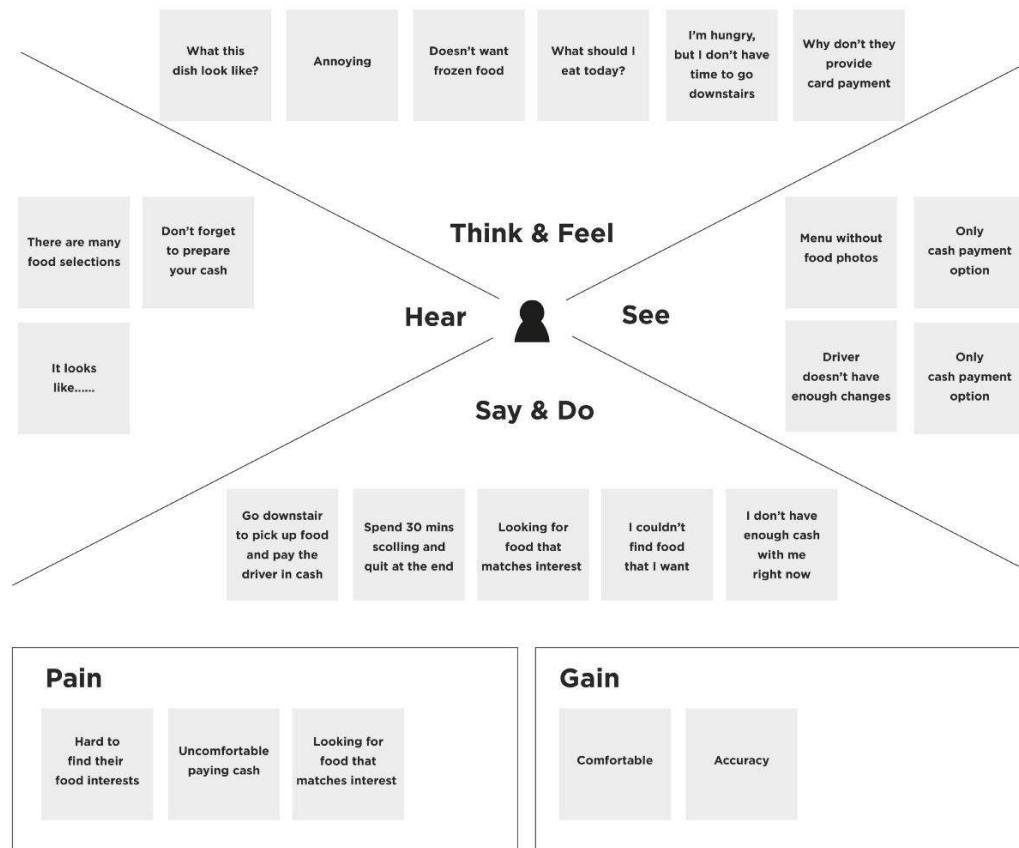

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Example: Food Ordering & Delivery Application

Think and Feel:

- **Worries:** "Will my cart empty itself if I close this tab?", "Is checkout secure?", "Am I ordering the correct size?"
- **Preoccupations:** Finding quality products without wasting time.
- **Aspirations:** Desires a seamless, aesthetic experience that feels premium and reliable.

Hear:

- **Friends:** "Use minimalist apps, they load instantly."
- **Influencers:** Promoting clean, direct-to-consumer online brands.
- **Colleagues:** "Make sure you download a proper receipt to get reimbursed."

See:

- **Environment:** Bloated e-commerce websites with intrusive popups and endless banners.
- **Market Offers:** Fast delivery options, but often paired with complicated checkouts.

Say and Do:

- **Attitude:** Advocates for simple digital services and dislikes entering unnecessary information.
- **Behavior:** Abandons carts immediately if forced to fill out long, irrelevant forms.

Pain:

- **Frustrations:** Complex sizing options for static products and slow page loads.
- **Obstacles:** Getting redirected to random pages or losing state after logging in.

Gain:

- **Needs:** Quick navigation, persistent carts, immediate local-currency calculation.
- **Measures of Success:** Under-two-minute checkout, clean downloadable invoices.
