

User Acceptance Testing (UAT) Template

Date	18 June 2026
Team ID	
Project Name	ShopEZ
Maximum Marks	

Project Overview:

Project Name: ShopEZ

Project Description: [Brief Description of the Project]

Project Version: Version 1.0

Testing Period: 1 June 2026 to 15 June 2026

Testing Scope:

Features and Functionalities to be Tested:

- User Authentication (Registration, Login, and JWT Token Validation).
- Role-Based Access Control and Route Guarding (Admin vs. Customer views).
- Adaptive UI Rendering (Dynamic toggling of size selectors based on product category).
- Client-Side Cart Persistence (Local storage and Context API synchronization).
- Admin Dashboard Analytics (Real-time aggregation of revenue, orders, and users).
- Order Management (Status updates) and Admin Reporting (CSV data exports and isolated @media print invoice layouts).

User Stories or Requirements to be Tested:

- USN-1 & USN-2: Guest account registration and secure user login.
- USN-3 & USN-7: Category-aware sizing displays on both the customer storefront and the backend admin catalog forms.
- USN-4: Shopping cart preservation across browser sessions and page refreshes.
- USN-5: Automatic dashboard routing and access denial based on JWT user roles.
- USN-8 & USN-9: Admin capabilities to update order statuses, export database tables to CSV, and trigger print-friendly physical invoices.

Testing Environment:

URL/Location: [Web URL or Application Location]

Credentials (if required): [Username/Password]

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Adaptive Size Selectors	1. Go to home page. 2. Click Fashion product. 3. Verify size buttons display. 4. Go back, select Electronics product. 5. Confirm size selectors do not appear.	Size selectors are visible for apparel but hidden for the electronic device.	[Record the actual outcome]	Pass
TC-002	Role-Based Redirect Guarding	1. Access /login. 2. Log in with admin credentials. 3. Check if URL is /admin. 4. Enter /checkout in address bar. 5. Confirm redirect back to admin.	Admin is automatically redirected to /admin dashboard; attempts to view customer pages are guarded and redirected back.		Pass
TC-003	Invoice Layout Printing	1. Log in as Admin. 2. Go to Orders table. 3. Click "Print" on order invoice. 4. Inspect print preview window.	All sidebars, navigation bars, and buttons are hidden. Only a clean physical receipt layout is shown.		Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Sizing selector flashes on screen for "Electronics" category on slow networks.	1. Throttle network speed to slow 3G. 2. Navigate to an Electronics product page. 3. Observe UI during the initial component mount.	Low	Closed	Added a loading skeleton state to keep the sizing component hidden until the category data is fully fetched from the database.
BG-002	Cart item counter does not immediately update when clicking "Add to Cart" rapidly.	1. Go to any product page. 2. Click the "Add to Cart" button 3 times in quick succession. 3. Check the cart icon counter in the navbar.	Medium	Open	Need to implement a debounce function on the button or ensure the React CartContext safely queues state updates before writing to LocalStorage.
BG-003	Floating chat widget appears on the printed order invoice.	1. Log in as an Administrator. 2. Navigate to the Orders table and click "Print" on an order. 3. Inspect the browser's print preview window.	Medium	In Progress	Will add display: none !important; to the .chat-widget class within the @media print CSS stylesheet to ensure isolation.

Sign-off:

Tester Name: Venu

Signature: Venu

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
